PR TRACKER

2021 CATALOG INNOVATIVE BOWHUNTING SOLUTIONS We started our company with one simple goal: help all archers recover game taken by archery. *No animal left behind!*

Our innovative products help us achieve this goal, including our radio frequency **Pro-Tracker Recovery System**, which has since gone viral!

You'll find our Pro-Staff team at trade shows or out in the field.

WE'RE UNIQUE

Many companies push out product after product, perhaps never taking enough time to fully develop their ideas.

What makes us different is the pride we have in our brand. We are archers at heart and respect our fellow archers. We take the time with each product to ensure maximum functionality and durability. In short, our products work.

Listed below are our finest product: The Pro-Tracker System, The Bad Boys, and our Carbon Arrows.

PRO-TRACKER RECOVERY SYSTEM

PROTRACKER A R C H E R Y

QUICKLY RECOVER GAME with our Radio Frequency Pro-Tracker Recovery System. The transmitter rests in the arrow shaft & deploys when the arrow penetrates the hide of the animal. The transmitter remains in the animal as the arrow continues to penetrate.

- ✓ Instantly sends a signal once deployed
- ✓ Waterproof. Transmitter can still signal to the receiver in the rain, snow, or puddle of blood!
- ✓ Tracking range up to 2 miles
- ✓ 18-20 hour rechargeable battery life

Patent No. 9,417,041 B2

BAD BOYS

Bad Boys are an FOC arrow sleeve that slides over the shaft of your arrow, allowing your shot to carry more momentum, which creates fatal penetration. Bad Boys increase your shot's effectiveness without sacrificing accuracy.

- ✓ Effective and Accurate
- ✓ Lethal Punch
- ✓ Fits Standard & Micro Shaft Arrows
- ✓ Easily interchangeable
- ✓ Works for you, not against you
- ✓ Grain weights 100, 125, 150, 200, 250 & 300

PRO-TRACKER ARROWS: THE STRAIGHTEST WAY

ty.

0

PRO-TRACKER ARROWS

STRAIGHTNESS

Our arrows have a tolerance of .001 – .003. Standard and Micro.

STRENGTH

Our arrows are built to withstand bone and can carry all the way through without compromising the integrity of the arrow. We carry spines of 250, 300, 350, 400.

HAND SELECTED & INSPECTED

We don't just look at one arrow and assume the next 100 are perfectly straight and good to go. Nope. We look at each individual arrow and make sure it's ready for the hunt. Overkill? Maybe. But we want to earn your business, which is why we'll stick to looking at literally thousands of arrows, individually.
